To Whom it May Concern:

I had the privilege of having Chardelyce Edwards as a student during the Capstone portion at the end of the Computer Science Bachelors degree program at Full Sail University.

Chardelyce worked as part of a group of teammates on an ambitious project spanning five months of design and development. Together, they adopted a platform they had little experience with and with research and determination they created a solid alpha version of their project. This often included learning new tech and going well beyond their comfort zones to deliver milestones.. As part of this team, Chardelyce was not only able to meet her deadlines without fail but also able to contribute to her teammates efforts.

In addition, Chardelyce was awarded Advanced Achiever for her graduating class. She was selected for this award by the Computer Science faculty as a result of her academic achievement, impressive work ethic, and zeal for learning which I saw first-hand in my courses.

I whole-heartedly recommend Chardelyce for employment within your organization. If you have any questions, please do not hesitate to contact me.

Warm Regards,

Rebecca Carroll
